

ultracraft®
custom cabinets for life

*Full Access.
More Storage.
Better Value.*

FULL ACCESS. BETTER VALUE.

At a quick glance, all cabinets look pretty much the same. We invite you to take a closer look. Compare UltraCraft full-access construction to typical face-frame cabinetry and see the value. Ask your Designer for more details.

TYPICAL FACE FRAME CABINET	FEATURE	ULTRACRAFT FULL-ACCESS CABINET
Check the competition. Not many manufacturers offer such a selection.	DESIGN STYLES 	<input checked="" type="checkbox"/> Your dream kitchen can be traditional, contemporary or anything in between. Choose from Wood, Deluxe Veneer, UltraLux, Thermofoil, Textured Melamine, Eurotek, Stainless Steel, Aluminum, or more.
Not many manufacturers modify a cabinet at no charge.	MODIFICATIONS 	<input checked="" type="checkbox"/> Design freedom that's easy on the budget. Custom Modifications means more storage, fewer fillers and a more balanced kitchen design. In most cases, we'll modify a cabinet, for no charge, up to the next standard-size cabinet.
You might find a nice selection of premium finishes, but none will match our low prices.	PREMIUM FINISHES 	<input checked="" type="checkbox"/> Design Heaven! Stains, paints, glazes and special combinations: Aged, Rubbed, Worn, Vintage, Heritage, Linen and Sangria... at some of the lowest prices around.
The face frame uses up interior cabinet space diminishing the purpose of a cabinet: storage! Plus, most have skimpy, half-depth shelves with limited adjustability.	STORAGE SPACE 	<input checked="" type="checkbox"/> Face frames take up space. Our cabinet interior is larger, has fully-adjustable, <i>full-depth</i> shelves, and provides up to 15% more interior storage space. And with no charge for Custom Modifications you can use every inch of your space.
Face frames create a lip around the inside of the cabinet, center stiles are in the way and both trap dirt and are hard to clean around.	EASY CLEANING 	<input checked="" type="checkbox"/> Save time with easy-to-clean Melamine interiors, standard on both our All-Plywood and Engineered Furniture Core cabinets. With no frame lip, cabinets wipe out easily. We only use center supports on extra-wide cabinets.
Many manufacturers offer full-access styling, but few achieve our tight tolerances. Most have 1/4" - or 3/8" -thick back panels limiting placement of installation screws.	FULL ACCESS 	<input checked="" type="checkbox"/> Most designers agree, tighter tolerances mean a better look. Our full-access construction, with true, full-overlay styling, has some of the tightest tolerances in the industry to create beautiful alignment. Full access construction also includes solid, 5/8" -thick back panels for easier installation.
Many manufacturers offer similar drawer systems, but few offer integral soft close hinges standard.	HARDWARE 	<input checked="" type="checkbox"/> No more slamming doors and drawers. Enjoy a quiet kitchen experience with our full-extension Wood Dovetail and Metal Drawers, and adjustable door hinges, which have state-of-the-art soft close action built in. Genuine Blum Hardware! 
The sides and floors of most cabinets are not flush, unless you pay for an upgrade. Even then you have a seam.	BETTER FLUSH 	<input checked="" type="checkbox"/> Better-looking designs always have flush sides and no seams. It is the look of fine furniture. Ours are always flush at no additional charge. Better yet, we have flush floors, too, for easier cleaning.
Check the manufacturer, some charge extra.	FINISHED ENDS 	<input checked="" type="checkbox"/> When a cabinet side is visible, like at the end of a run, it needs to be specially finished. We offer this feature at no charge.
This is a rare, and usually expensive, option found only on custom cabinetry.	LOW SHEEN 	<input checked="" type="checkbox"/> No extra charge for the optional, low-sheen look of high-end furniture.
Many manufacturers use paper or vinyl which can peel. Others use veneer, which is neither scratch- or moisture-resistant and can harbor bacteria. Most charge for finished interiors on open cabinets.	INTERIOR 	<input checked="" type="checkbox"/> Our standard interiors are thermally-fused Melamine on either Engineered Furniture Core or Plywood. Easy to clean and moisture- and scratch-resistant. Glass and open cabinets feature a no-charge, finished interior for a richer appearance.
Most manufacturers leave raw board materials on the backs of their cabinets and even on the most-vulnerable bottoms of base cabinets.	PROTECTION 	<input checked="" type="checkbox"/> Protection against moisture means exposing as little raw, unfinished surface material as possible – especially on the backs and bottoms of cabinets. We also edgeband these areas on all of our cabinets, even when you choose our Plywood option!
Ask your designer for details. Some environmentally-friendly manufacturers are greener than others.	EARTH GENTLE 	<input checked="" type="checkbox"/> UltraCraft is certified to the KCMA Environmental Stewardship Program and complies with strict CARB standards.
Check the competition.	AMERICAN MADE 	<input checked="" type="checkbox"/> UltraCraft cabinetry is manufactured in Liberty, North Carolina, in the heart of the country's furniture manufacturing industry, from domestically and globally sourced components.
Few match our warranty for 100 years. In some states, a "lifetime" warranty is not as long as you might think.	WARRANTY 	<input checked="" type="checkbox"/> We warrant to the original purchaser that our products will be free from manufacturer defects for 100 years from the date of purchase. Beat that.
